MICHAEL M. KANG
Android Developer
Seattle / **mgkang0206@gmail.com** <**Github** - **Linkedin** - **Portfolio**>

SUMMARY
   I am an Android developer who creates applications that makes people manage their lives more efficiently. While working in a health field and studying to become a doctor, I have learned the importance of time management and using resources effectively.

SKILLS
- Java, Android SDK, XML, UI Development & Material Design
- SQL Database, APIs, Networking & Performance Management
- Okhttp, Retrofit, Firebase, ButterKnife
- Language: Fluent in Korean, English and basic Japanese

PROJECTS
Find My Pet Seattle, WA - Github   Jul. 2016
Seattle public API and Socreta Hackathon Winner: The app displays regularly updating information about lost & found animals in Seattle for owners of missing pets. My responsibilities included: Initiating API implementation, and structuring UI elements to meet the requests of UX designers.

Builders Lighting Seattle, WA - Github   Aug. 2016
Contract Android Development: Application aimed at simplifying the process of large-scale ordering for lighting contractors. My main responsibilities included: Building SQLite database, setting up UI elements on top of making sure the application adopts to various screen sizes and orientations, and set up Google Analytics.

Autel Robotics Seattle, WA - Github   Sep. 2016
Contract Android Development: Flight planning application for drones in the agriculture industry. My primary responsibilities included: Setting up UI elements and make them function along with database utilizing various libraries, setting up Google Places API, and initialize Google Analytics.
